About Me

I am a Software Engineering undergraduate and aspiring Frontend Developer Intern with hands-on experience in building responsive, API-driven web applications using modern frontend technologies. I specialize in creating clean user interfaces, integrating REST APIs, and translating real-world problems into functional web solutions. Alongside frontend development, I have a growing interest in data analytics and visualization, enabling me to build interfaces that are both visually appealing and data-driven. I am eager to learn, adapt, and contribute to real-world development teams.

PROJECTS

- **BloomStore – E-commerce Web Application:** Built a responsive e-commerce frontend using React, Tailwind CSS, and FakeStore API with dynamic product listings and cart functionality.
- **SkyScope – Weather Forecast Web App:** Developed a real-time weather application using React and Weather API, featuring location search and dynamic UI updates.
- **CountryNavigator – Country Information Platform:** Created an interactive web app using JavaScript and REST APIs to explore country data with responsive UI design.
- **Automated Data Visualization System:** Designed a frontend-based data visualization system using JavaScript, Chart.js, and Recharts to convert structured data into interactive dashboards.

WHY I STAND OUT

Frontend developer with hands-on experience in API-driven projects, combining clean UI design with data-focused problem solving. Industry exposure through internship, strong fundamentals, and continuous learning in **Data Analytics** and **Mobile App Development**.
